### Lecture Summary

Review various site planning and design techniques, approaches, principles, successes, pitfalls, and roadblocks to designing Green Infrastructure. How do historical natural patterns of hydrology and landscape impact manmade, designed and manipulated patterns?

### BIO

Tom Mortensen, PLA, ASLA, is a site planner and landscape architect with raSmith. He has over 35 years experience in site planning, park and public open space design, restoration plans, and integrated stormwater management/green infrastructure.
